

Git kynning fyrir kennara í raftækniskólanum

hvað er Git

- Git - guthub - gitlab
- markdown
 - [Markdown Cheat-Sheet](#)
- uppsetning
 - [vs code](#) innbygggt github
 - [Git](#) og [Gitbash](#) fyrir lengra komna
 - [Github](#)

Mostly, Markdown is just regular text with a few non-alphabetic characters thrown in, like # or *.

EMPHASIS

```
*This text will be italic*  
_This will also be italic_
```

```
**This text will be bold**  
__This will also be bold__
```

```
*You **can** combine them*
```

GITHUB FLAVORED MARKDOWN

GitHub.com uses its own version of the Markdown syntax that provides an additional set of useful features, many of which make it easier to work with content on GitHub.com.

USERNAME @MENTIONS

Typing an @ symbol, followed by a username, will notify that person to come and view the comment. This is called an “@mention”, because you’re mentioning the individual. You can also @mention teams within an organization.

ISSUE REFERENCES

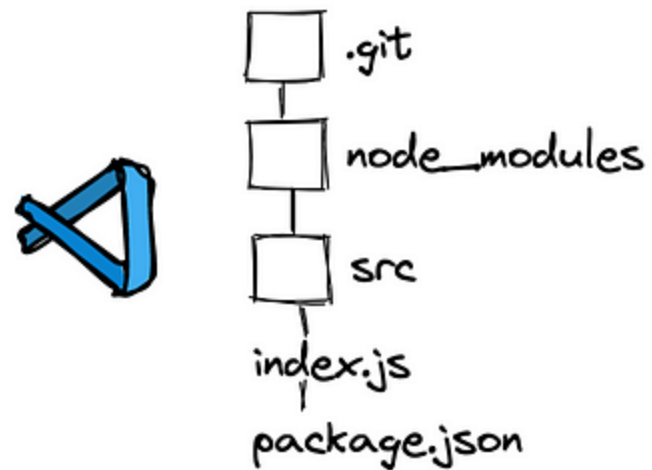

Any number that refers to an Issue or Pull Request will be automatically converted into a link.
